

Regulations for Accommodation Establishments and Regulated Businesses

Our aim as the Namibia Tourism Board is to strive to serve our customers professionally and to their satisfaction by making customer service our core business. In enhancing our motto, we have made the recently launched tourism regulations available online for your convenience.

The purpose of these regulations is to enhance the level of quality and standards of our tourism product, leveling the playing field and preventing fly-by-nights from spoiling the quality of experience that our visitors deserve in exchange for their valuable money.

Apart from the private-sector involvement in developing these standards, comparisons were also made with the current trade, both in the SADC region and globally, to ensure that our standards are inline with the current international trends and practices.

For Namibia to maintain visibility in the world and to sell itself as quality tourism destination, its marketing efforts must be supported by sustainable resources. The tourism levy is one of the ways to fund such efforts. The levy formula, which is the basis of calculating the levy amount payable to the NTB, was issued by the Ministry of Environment and Tourism after extensive consultations with the private tourism industry and other relevant government ministries and agencies.

For submitting of application forms: mail / hand delivery only
